## PROJECTS

### Operating System

work in progress

https://github.com/Mikhail038/ZeroOS

C++ Assembly

Project to explore Operating Systems. Uses grub to boot-load system. On current moment has implementation of keyboard driver (interruption manager + hardware communication) and simple Text User Interface.

### Stack

https://github.com/Dash8f/Stack

C

Stack is a small project that implements the basic functionality of a stack data structure.

### Game snake

work in progress

https://github.com/Dash8f/Game\_snake

C++

This simple project is a classic snake game.

## SUMMARY

I am 2nd year DREC MIPT student. Mostly experienced in C programming, now learning C++. I like to explore how things work and implement it on my own. I easily communicate with people and work in team.

## STRENGTHS

C/C++ Git Make Linux

Hard-working Motivator & Leader

Learning ability

## LANGUAGES

Russian

English

## EDUCATION

B.Sc. in Applied Mathematics and Physics

MIPT

Sept 2022 – June 2026

## ADDITIONAL COURSES

Base C++

VK Education

Sept 2023 – Nov 2023
